PROFESSIONAL TITLE

Backend Developer | AI & Automation Specialist

PROFILE SUMMARY

Self-driven Backend Developer and Tool Maker from Uzbekistan, focused on building bots, APIs, AI integrations, and developer tools. Experienced in designing scalable backend services with Go, Python, and PHP, and in deploying production-ready containerized infrastructure with Docker. Currently exploring local LLM workflows, MCP protocol servers, and AI-powered automation pipelines.

CURRENT FOCUS

- Backend development with Go and Python
- AI integrations and automation
- Dockerized service delivery and deployment
- Developer productivity tools and bot constructors
- MCP servers and local LLM workflows

EDUCATION

Bachelor of Computer Science Namangan State University (NamDU) Faculty of Physics and Mathematics Field: Computer Science and Programming Technologies Student ID : 309231101913 JSHSHIR : 52309057120033 Group : K.KID-AU-23 Study Mode : Evening (Bachelor’s degree) Payment : Contract-based Current Year : 4th year (2026-2027 academic year) Current Sem. : 7th semester

PROFESSIONAL EXPERIENCE

BACKEND DEVELOPER & AI AUTOMATION SPECIALIST Self-employed / Freelance | 2022 - Present

Key responsibilities and achievements: - Built scalable backend services and REST API systems using Go, Python, and PHP - Designed and deployed AI-integrated Telegram bots with admin panels - Developed custom MCP (Model Context Protocol) servers for LLM integration workflows - Created developer utilities for localization (i18n) and productivity - Delivered containerized deployments using Docker & Docker Compose - Managed Linux servers (Nginx, Apache, PostgreSQL, MySQL) - Implemented CI/CD pipelines with GitHub Actions

PROJECTS

1. E-COMMERCE API Description : Scalable e-commerce backend with JWT auth, product CRUD, and order management Stack : Go, PostgreSQL, Docker Status : Live
2. AI TELEGRAM BOT Description : Multi-language Telegram bot powered by Ollama and DeepSeek, with admin panel and user management Stack : Python, Ollama, Telegram Bot API Status : Live
3. DOCKER DEPLOY STACK Description : Production-ready Docker Compose stack with Nginx, PostgreSQL, Redis, and monitoring, powered by GitHub Actions CI/CD Stack : Docker, Nginx, GitHub Actions Status : Open Source
4. MCP SERVER TOOLKIT Description : Model Context Protocol servers integrating local LLMs (Ollama) with tool calling and context management Stack : Python, MCP Protocol, Ollama Status : Case Study
5. PORTFOLIO CMS Description : Lightweight CMS built on PHP and MySQL, integrated with Sitejet API, form handling, and image proxy Stack : PHP, MySQL, Sitejet API Status : Open Source
6. LINUX MONITORING BOT Description : Real-time server monitoring bot reporting CPU, RAM, disk, and network stats via Telegram Stack : Bash, Linux, Telegram Bot API Status : Live

CERTIFICATIONS & ACHIEVEMENTS

- Consistently high GPA (4.77 in the latest academic year)
- Active open-source contributor on GitHub
- Regular technical writer on Telegram dev blog
- No academic debt across all completed semesters

INTERESTS

- Open-source contribution
- Local LLM experimentation
- Developer tooling
- Automation and scripting
- Cloud-native architecture
- Technical writing and knowledge sharing

AVAILABILITY

Status : Open to Work Work Mode : Remote-friendly Preferred Roles : Backend Developer, AI Engineer, DevOps Engineer, Automation Specialist Location : Uzbekistan (Remote worldwide)
